How to connect your device to the Wi-Fi network

You will receive one ticket per person indicating your personal login details from the facility manager (please keep it in a safe place). This code will let you connect up to three devices to the Wi-Fi network.

You must register within seven days or your ticket will expire.

You will find the following important details on the ticket:

1. Username
2. Password
3. Name of the Wi-Fi network (SSID)
4. Wi-Fi network password

**Step 1:**
Using your device, search for existing Wi-Fi networks and connect to the Osnabrück Student Services Wi-Fi network (Studentenwerk) (point 3, see above).

**Step 2:**
You will be requested to enter the password for the Wi-Fi network. Please enter the valid password (point 4, see above).

**Step 3:**
A login page requesting a username and password will either appear automatically on your device or when you view a page in your Internet browser for the first time (depending on your device). If the page does not open automatically, open your browser and go to http://1.1.1.1.

**Step 4:**
Enter your username and the password (points 1 and 2, see above) and click on “Verbinden” (connect).

Your device is now connected to the Internet. Your device should remember your login data, meaning that, from now on, you will automatically be connected to the network (depending on your device).

Nevertheless, please keep your ticket in a safe place in case you need to reconnect to the Wi-Fi!
